

Study Civil Engineering & Architecture!

D-50 [%] 1 kHz

Studying Civil Engineering and Architecture enjoys a long tradition in Germany. Even today, civil engineers who gain an internationally recognised Bachelor or Master degree in Germany belong to the world's best.

Whether we are talking about domes, bridges, tunnels, dams or roads – constructions fascinate us and characterise our lives; they are an expression of our culture. The needs of man, the economy and society are realised in construction and by civil engineers. These needs are ever-changing, constantly posing new challenges to civil engineers. Nowadays, construction involves mastering new enhanced tasks, working together with other specialist areas in an interdisciplinary manner. Prerequisites for this are excellent specialist and professional competence and the ability to communicate with contractors, citizens and politicians.

We actively help you apply to study at a German institution of higher education! Here is a SELECTION of innovative and interdisciplinary degree programmes at universities and universities of applied sciences in Germany:

Degree Programme	Degree	Name of University
Industrial Engineering/ Construction	Bachelor	Berlin Technical University of Applied Sciences
Civil Engineering & Geodesy	Bachelor & Master	Darmstadt University of Technology
Computing in Construction	Bachelor	Neubrandenburg University of Applied Sciences
Civil Engineering	Bachelor & Master	Munich University of Technology
Construction Technology	Bachelor	Berlin University of Technology
Architecture	Bachelor	Aachen University of Technology
Landscape Design	Bachelor	Berlin University of Technology
Nature Conservation & Landscape Planning	Bachelor & Master	Anhalt University of Applied Sciences
Landscape Ecology	Bachelor	University of Münster
Media Architecture	Master	Bauhaus University of Weimar
