

# Study Environmental Sciences!

The guideline that will take humanity into the next millennium is the concept of sustainability. The use of regenerative energies such as hydropower, wind power, solar energy and geothermal power, which do not have a negative impact on the environment, is one of the greatest challenges of the 21st century. Germany belongs to the world's best when it comes to seminal subjects such as the use of regenerative energy, environmental technology and ecological awareness. This is also reflected in the comprehensive range of environment-related degree programmes at German universities and universities of applied sciences. Oriented towards the issues and tasks of the future, environment-related degree programmes are increasingly taught in an interdisciplinary manner or with an international outlook. Graduates can find employment throughout the world. The possibilities of employment for graduates of these innovative degree programmes are manifold: in national and international companies in the field of the power industry, environmental technology and environmental protection organisations or in a ministry of the environment.

**We actively help you apply to study at a German institution of higher education! Here is a SELECTION of innovative and interdisciplinary degree programmes at universities and universities of applied sciences in Germany:**

Degree Programme	Degree	Name of the University
Process-integrated Environmental Protection	Bachelor	Jena University of Applied Sciences
Regenerative Energy Systems	Bachelor & Master	FHTW Berlin University of Applied Sciences
Rural Management & Environmental Protection	Bachelor	University of Rostock
Crop Production Ecology	Bachelor	University of Rostock
Environmental Sciences	Bachelor	University of Bielefeld
Regenerative Energy Management	Bachelor	Nordhausen University of Applied Sciences
Forest Management and the Environment	Bachelor	University of Freiburg
Applied Environmental Sciences	Bachelor	University of Jena
Mechanical Engineering/ Energy & the Environment	Bachelor	Aachen University of Applied Sciences
Marine Environmental Sciences	Master	University of Oldenburg
